

UNITED STATES GOVERNMENT

Memorandum

TO : AD/OEL

DATE: 1 March 1965

FROM : DAD/S&D

SUBJECT:

25X1A

██████████ requested that this proposal be given technical review in S&D.

I have discussed this with ██████████ and we are both rather ignorant of the requirement for System III. Through conversations with ██████████, we have determined that OSA/Commo has not carried any System III equipment since October last and that there is no interest in NSA in the take nor is there interest here. This apparently stems from the fact that the material collected is redundant and of poor quality than what is available from other sources.

25X1A

I also discussed very briefly with ██████████ could OPD of Staff determine the need or requirement against which the follow-on equipment should be assessed?
